

[One Stop Shop \(OSS\)](#) and [WeatherShare](#) Update – January 12th, 2011 (expanded version)

One Stop Shop (OSS) and WeatherShare are overlapping, but complementary websites. While WeatherShare is geared towards weather information only, One Stop Shop adds information such as camera images and sign messages. And, OSS provides coverage for Oregon, although weather information is only shown for California. It's taken us a couple weeks to put this update together, but we wanted to show how these systems indicate severe weather and road conditions.

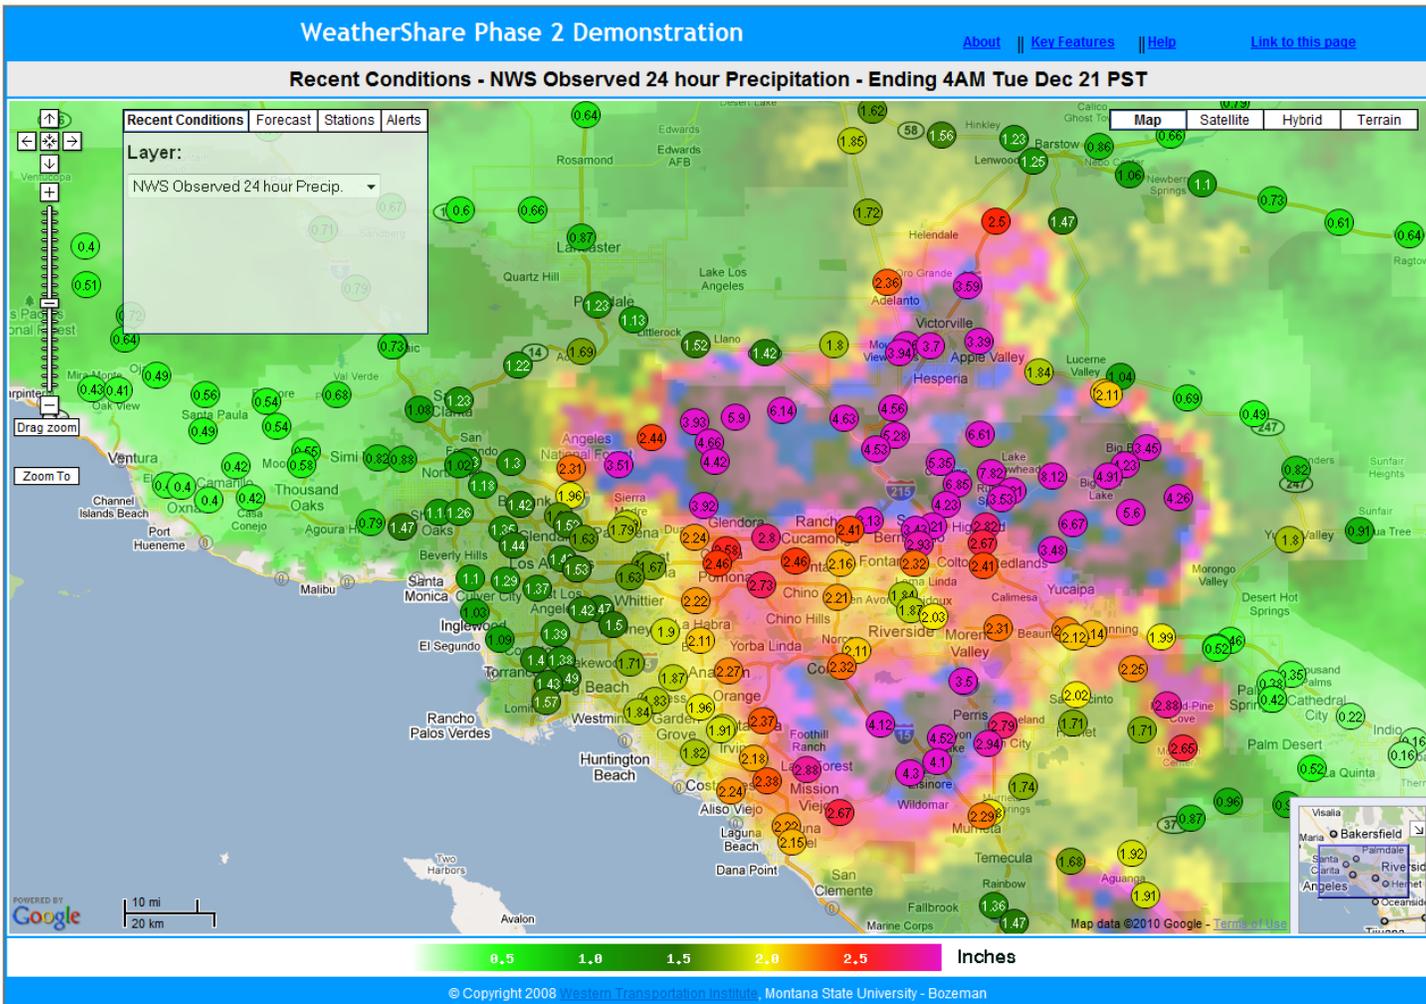

On December 21st and 22nd, there was a great deal of precipitation throughout California and Oregon. Here we've grabbed approximately 50 screenshots to show magnitude of the storm, and the wealth of information available in WeatherShare and OSS.

The NWS Observed 24 Hour Precipitation layer in WeatherShare (and OSS) shows estimated precipitation throughout California. Information from sensors and some complex models from the [PRISM Group at Oregon State University](#) are used to make these estimates. In the following image from WeatherShare, you'll see a large amount of precipitation throughout the state, including very heavy precipitation in the Los Angeles area:

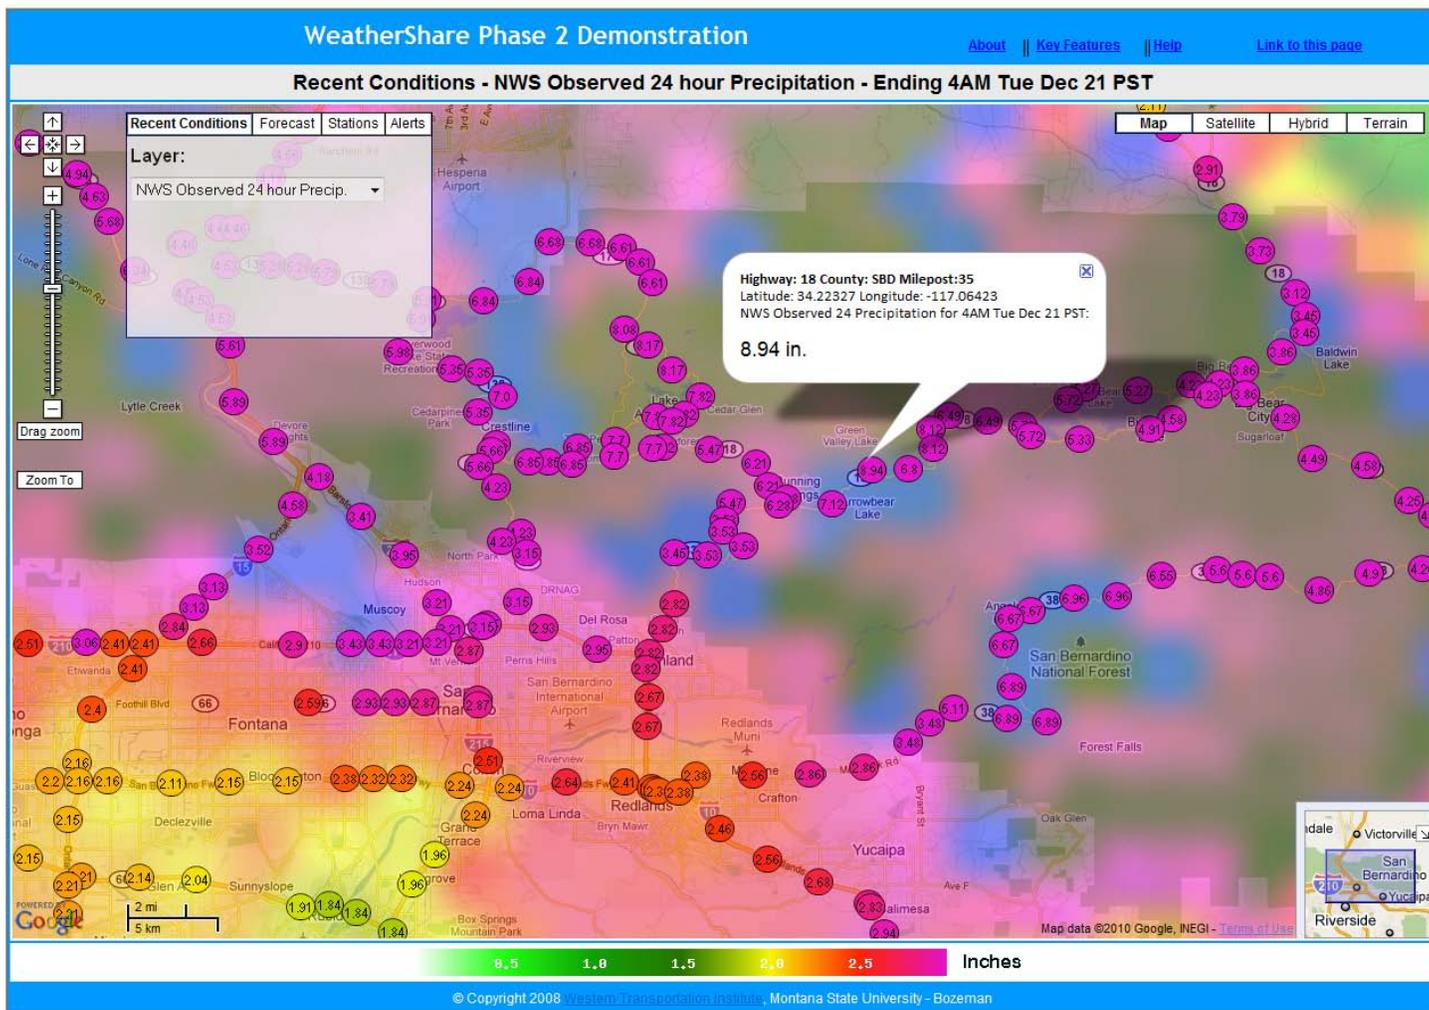

We zoom in on the Los Angeles area and find values of over 4 inches (and more) from the past 24 hours:

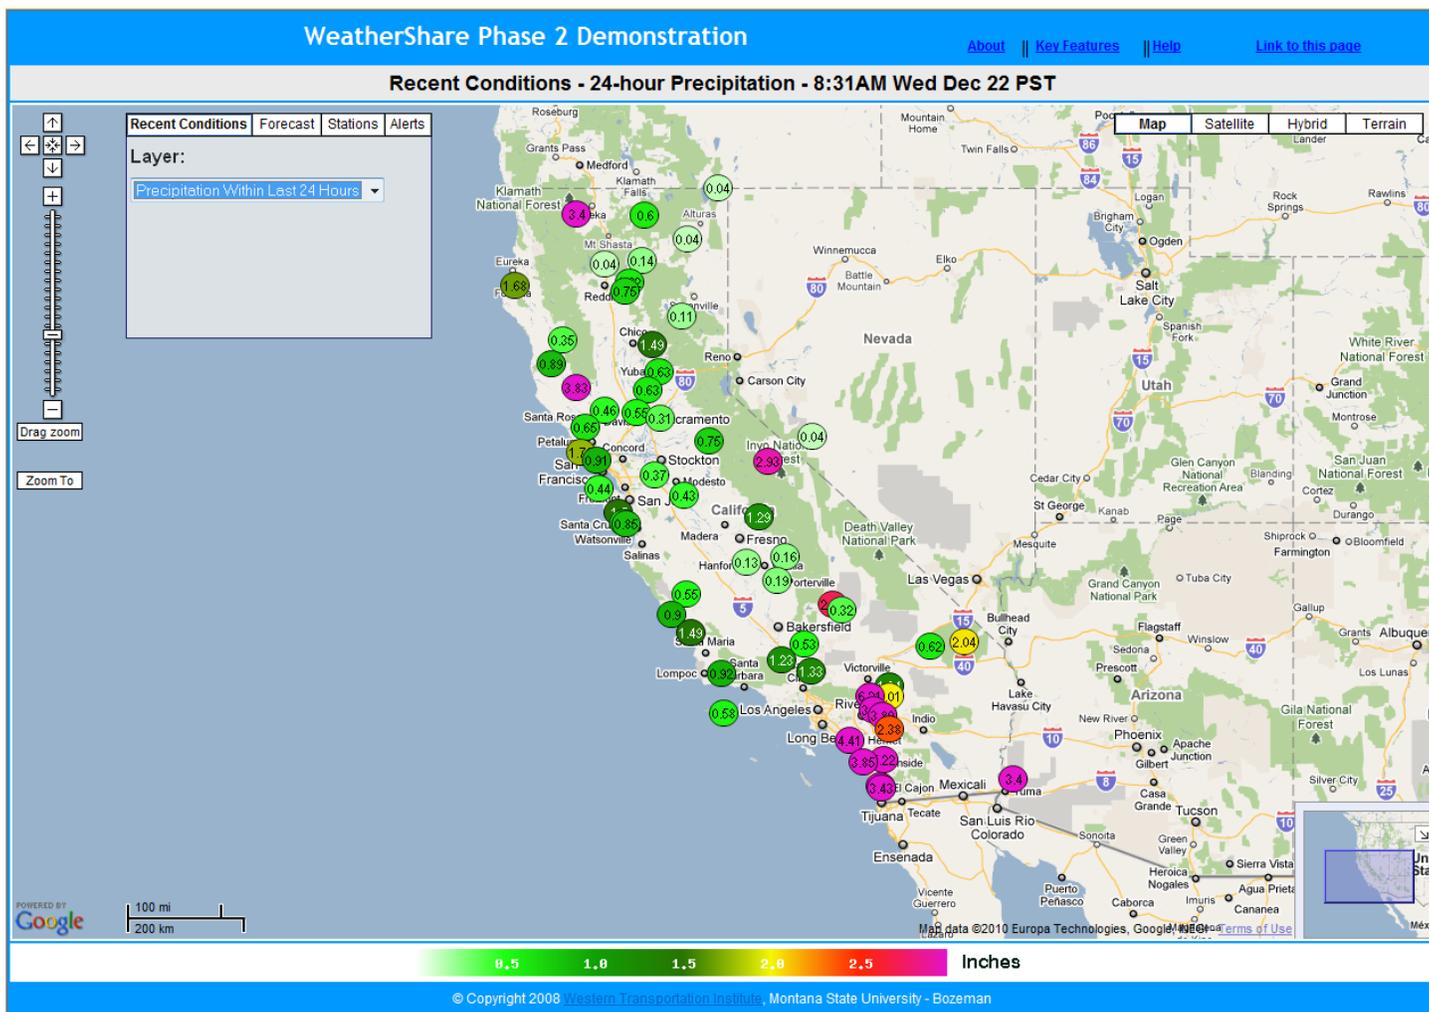

Here's one of the highest values we found – 8.94 inches along Highway 18:

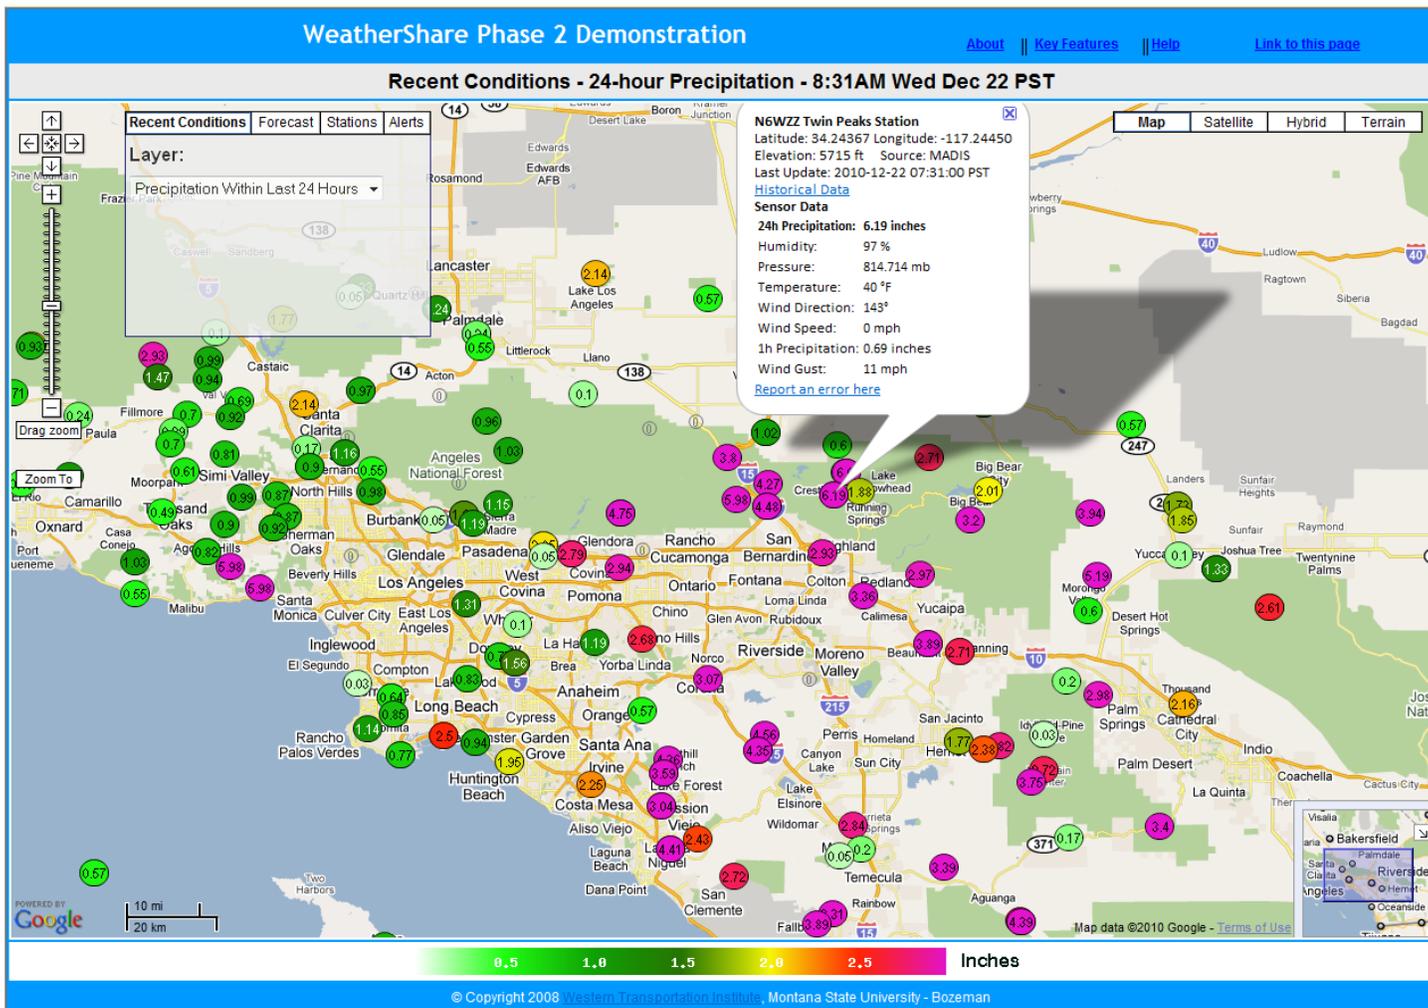

The Precipitation Within the Last 24 Hours layer shows readings from specific sensors. These readings show a lot of variability:

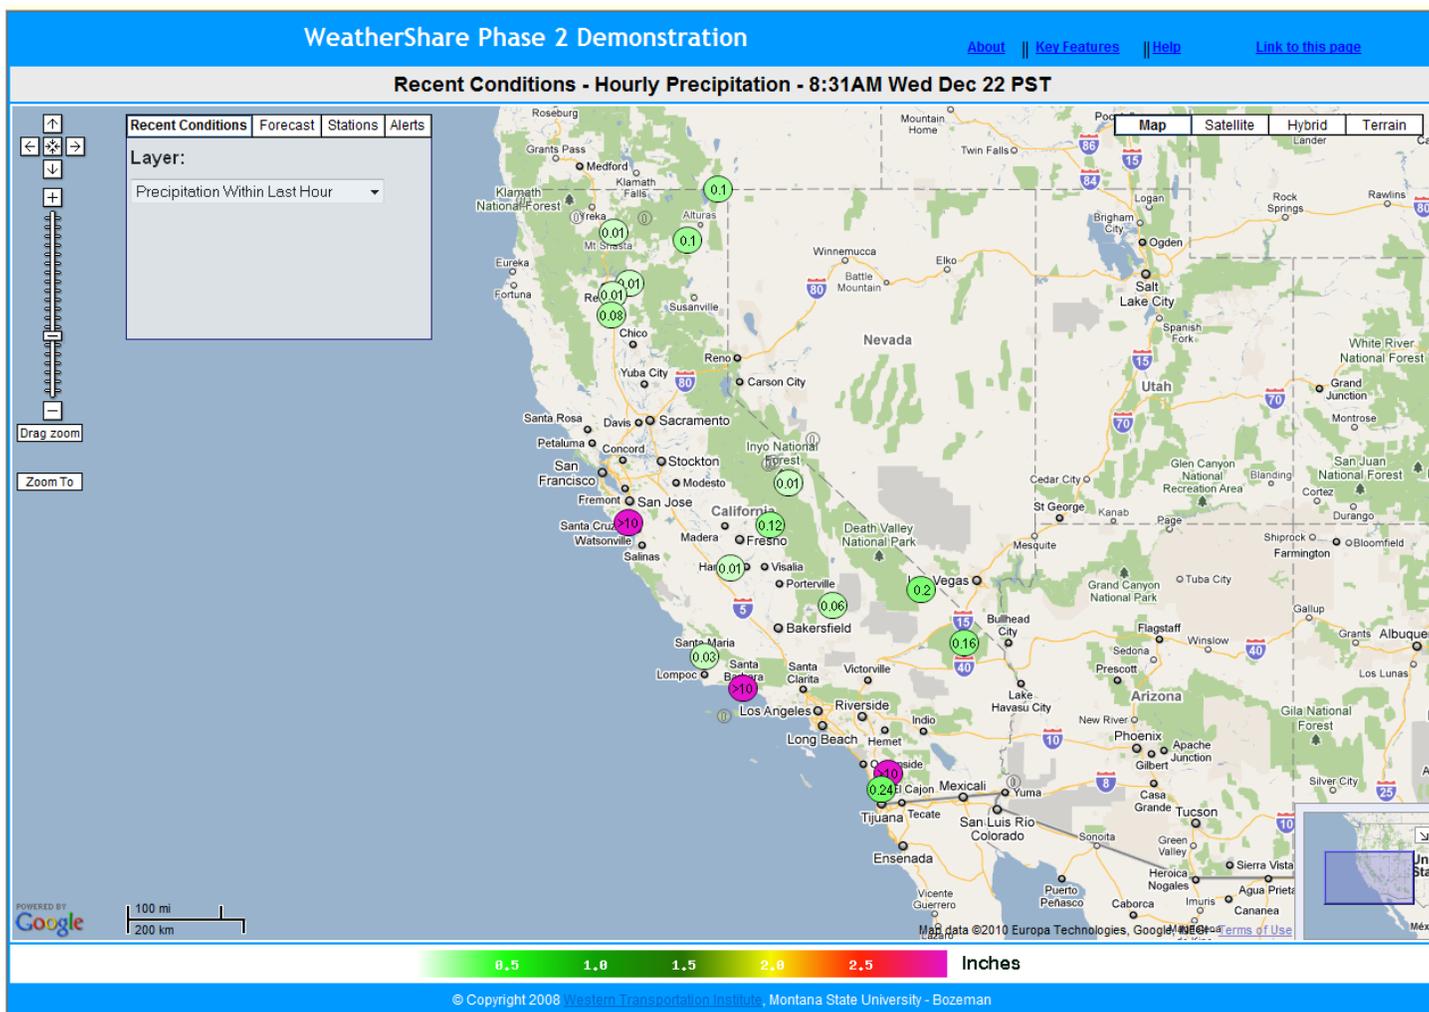

You will see extreme values, though, in-line with those we saw in the NWS Observed Precipitation layer:

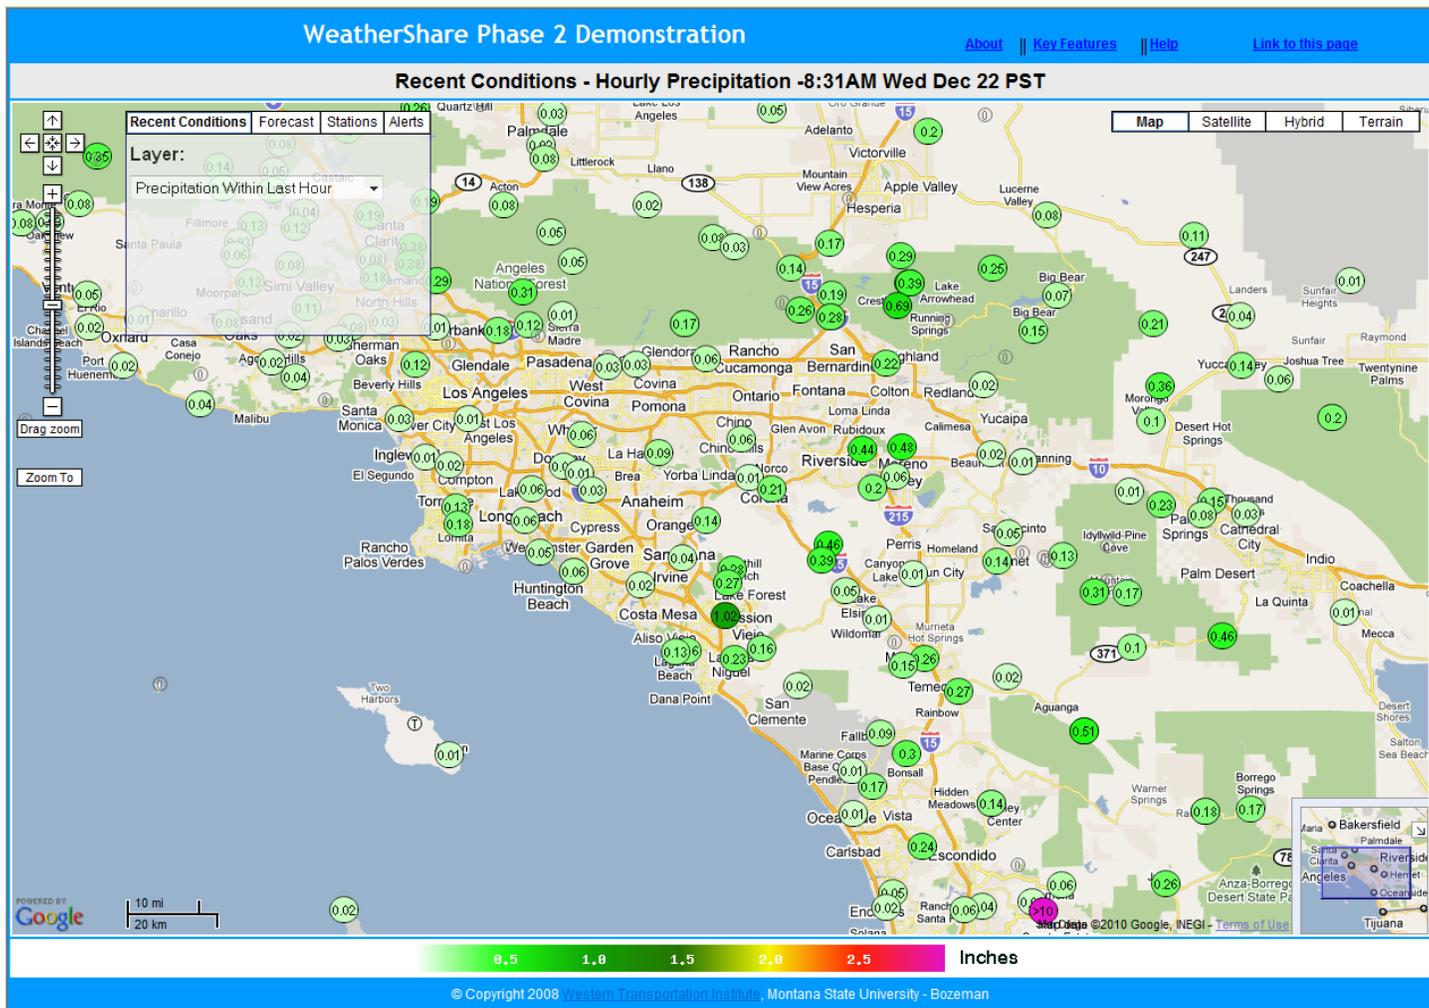

The Hourly Precipitation layer has even more variability, and you will encounter some readings that are obviously in error - >10 inches in the past hour – although perhaps some sensors approached such extremes:

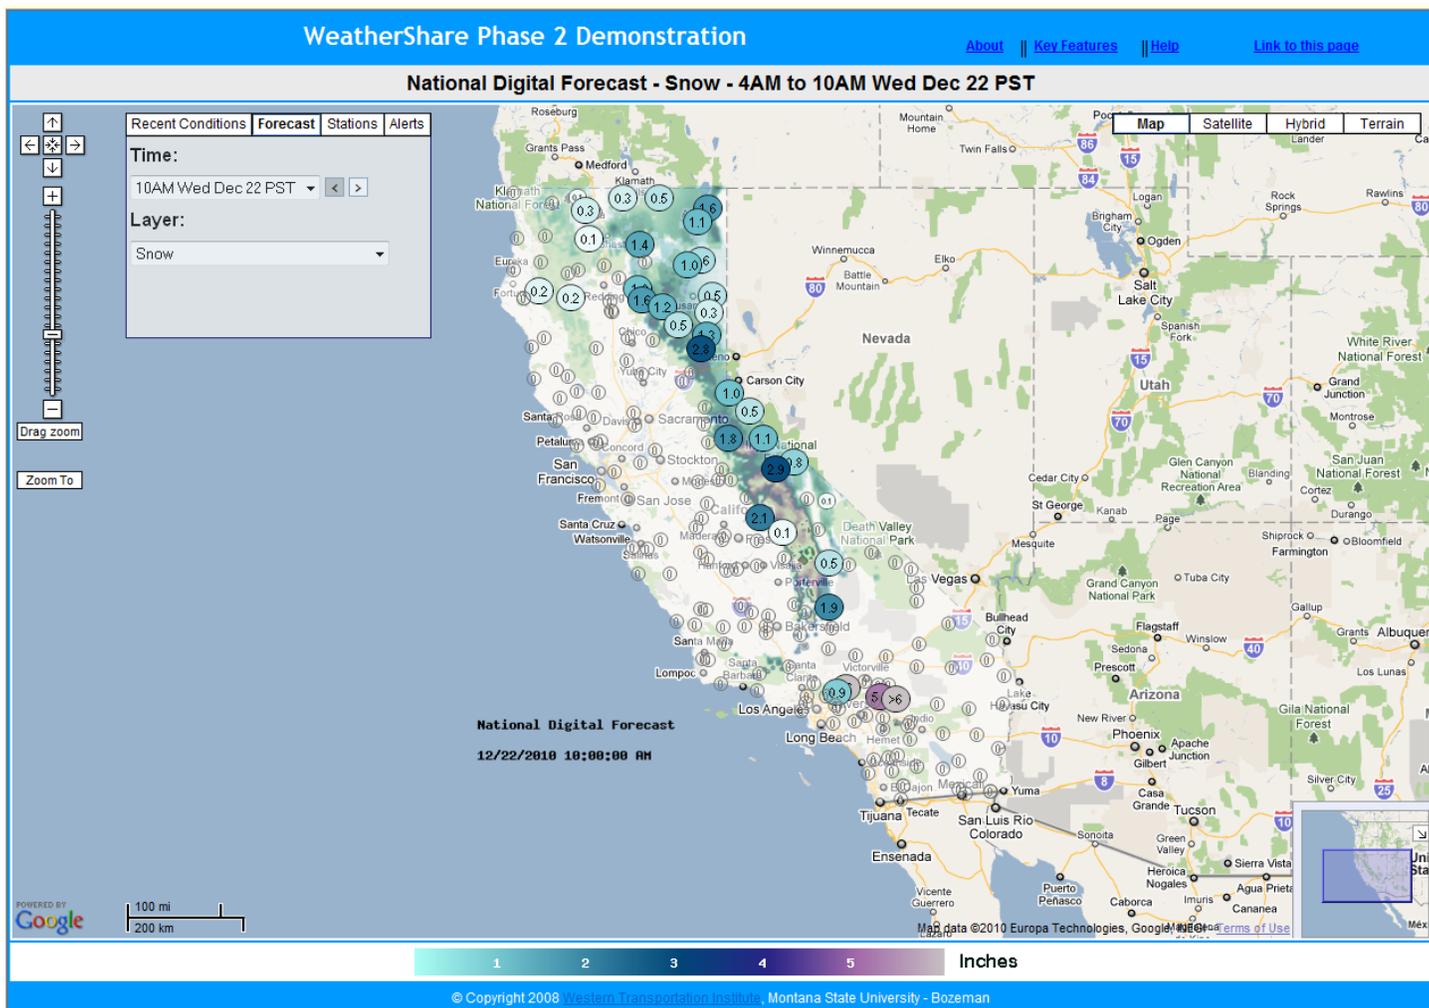

Here are hourly precipitation readings from sensors in the Los Angeles area:

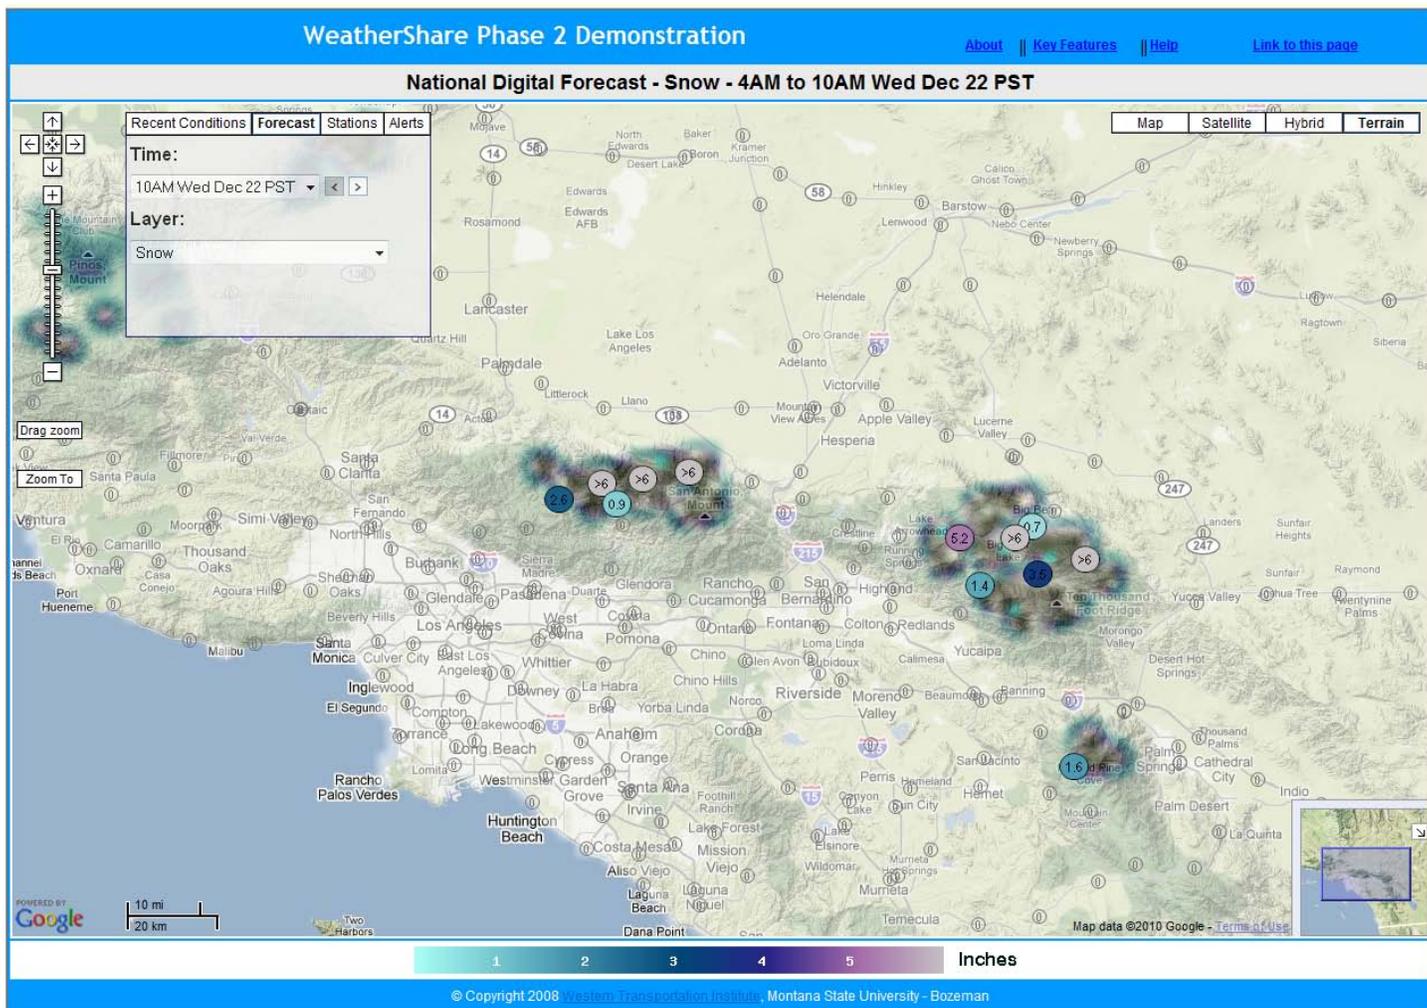

Not only are past and current weather information available in these systems, we also show forecasts using data from the National Weather Service’s National Digital Forecast Database (NDFD). Here is forecasted cumulative snow for a six hour period:

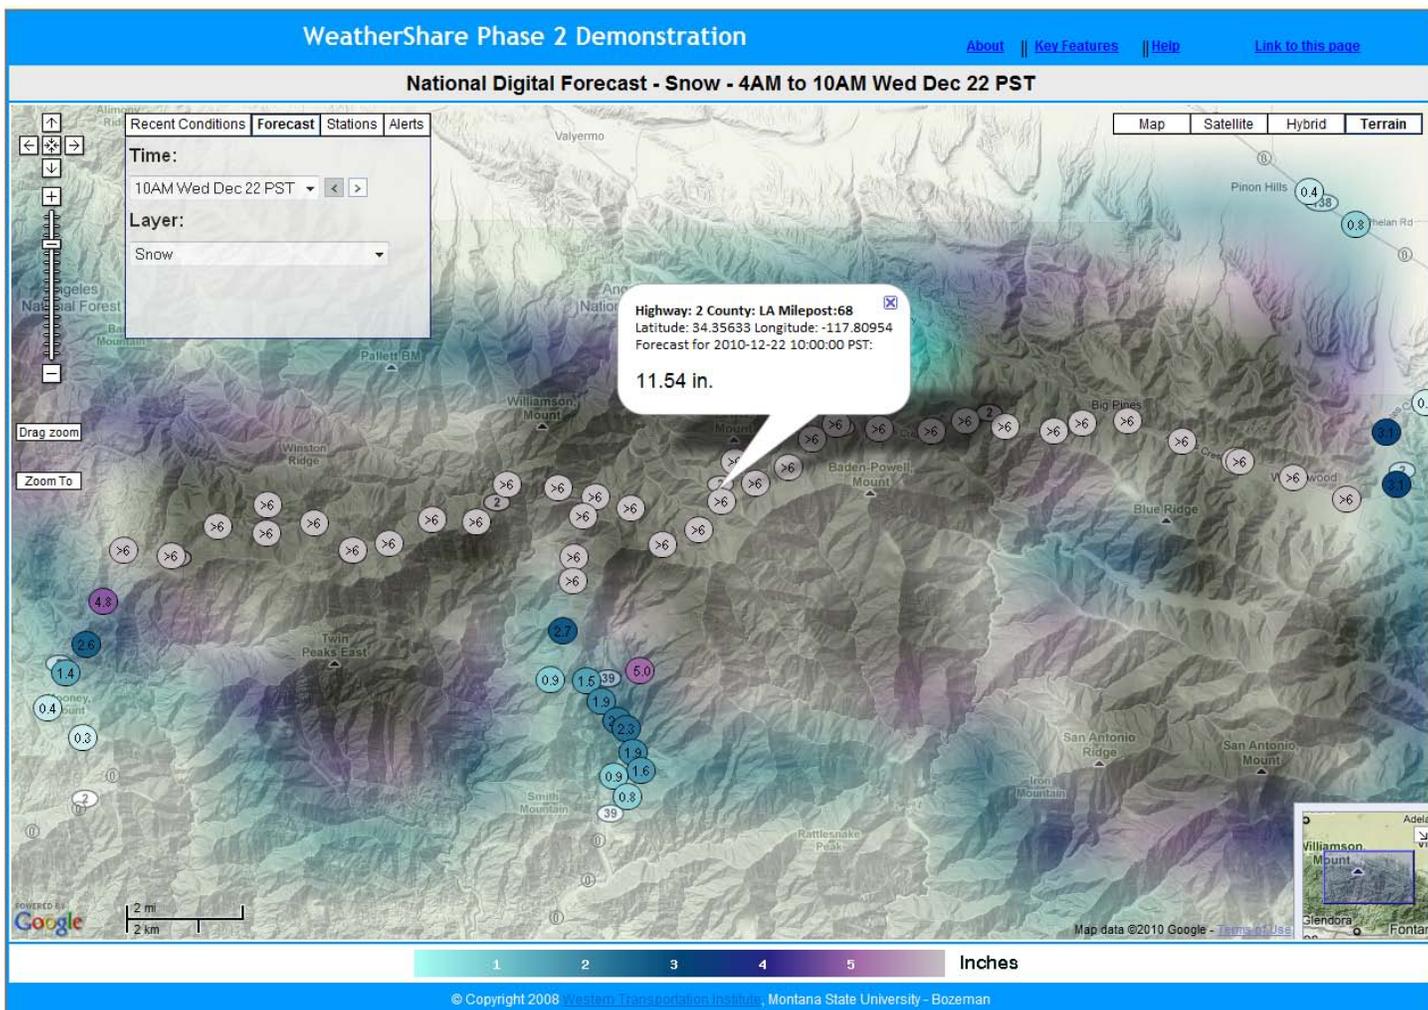

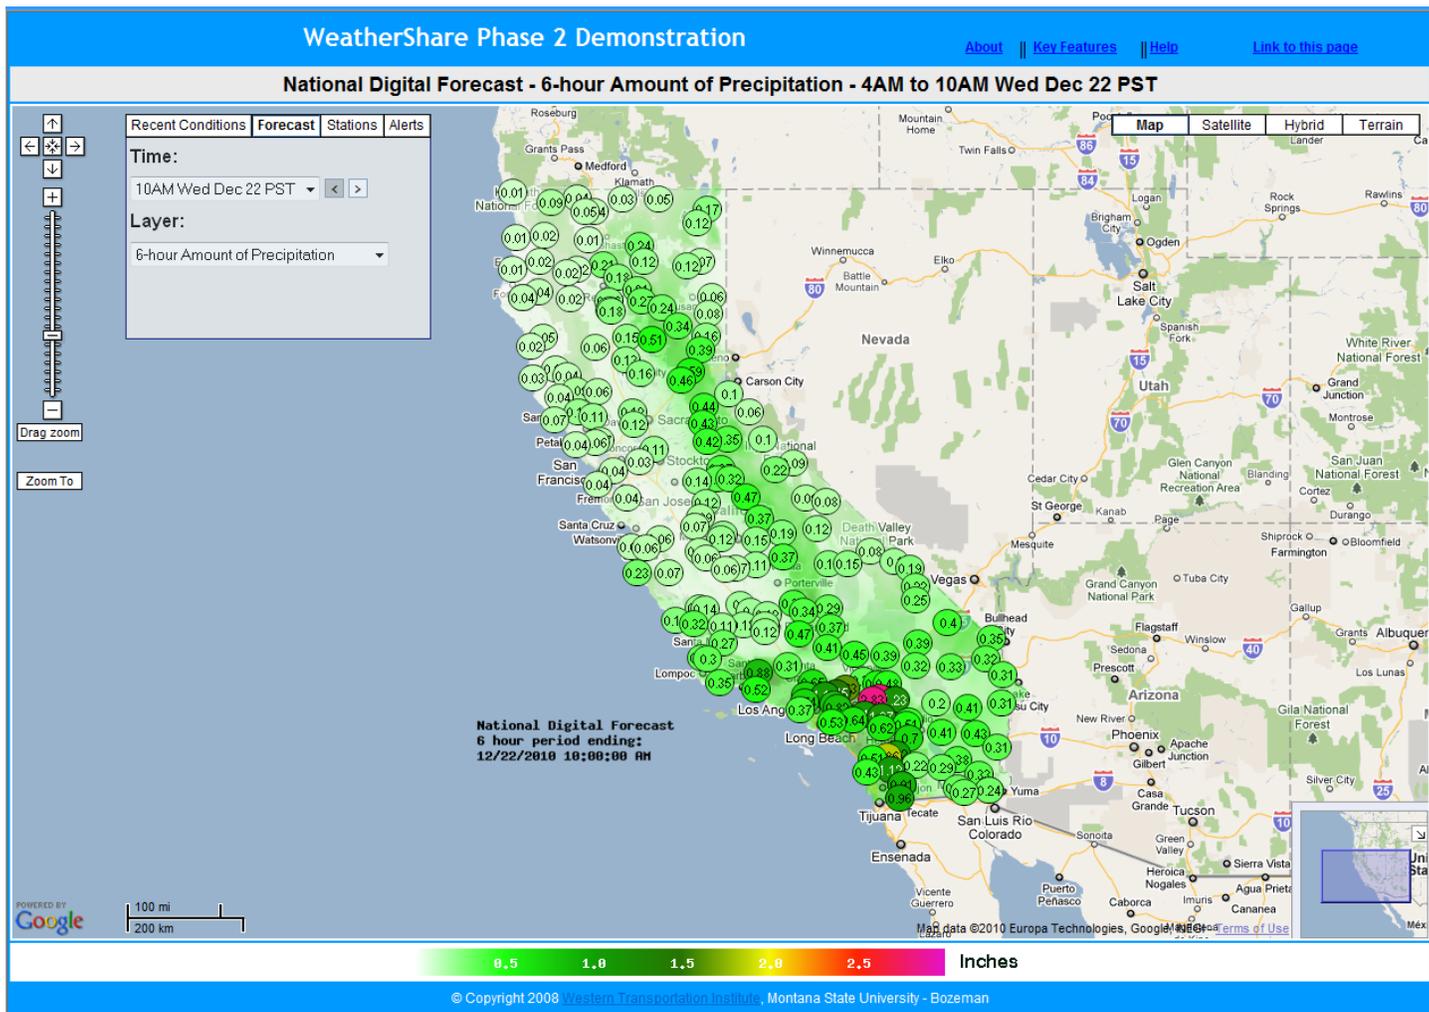

The forecast amounts of snow were high in the mountains near Los Angeles:

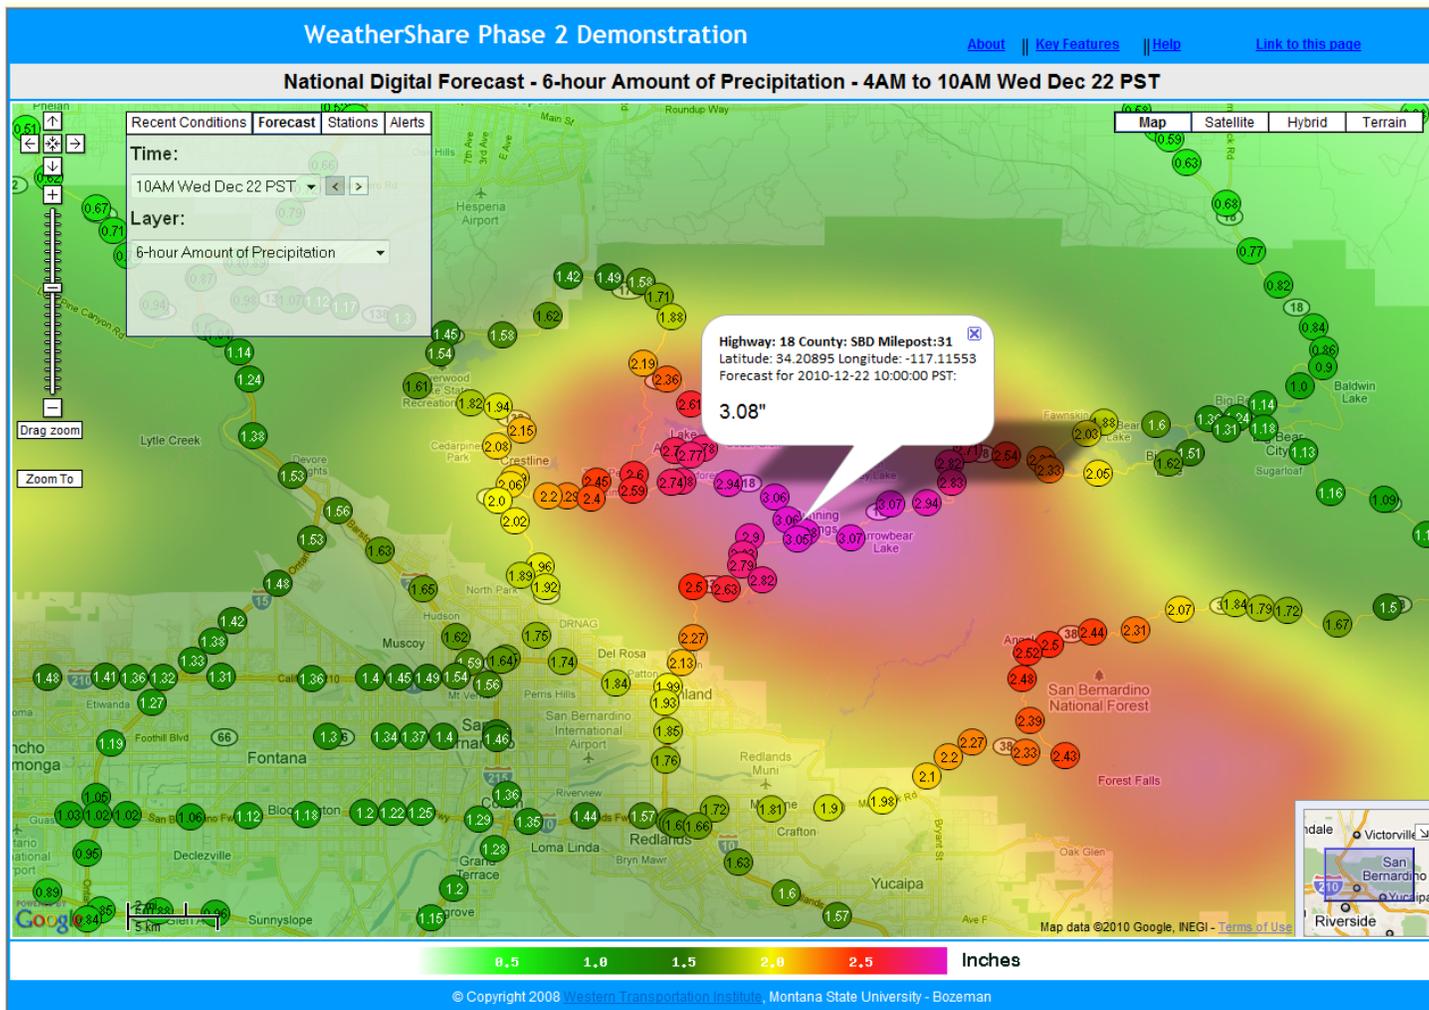

We zoom in for further detail and find the following location along Highway 2, which indicates over 11 inches of snow during this 6-hour period:

Similarly, the forecasted 6-hour amount of (liquid) precipitation can also be viewed:

Here, along Highway 18 near Los Angeles, over 3 inches of liquid precipitation is predicted:

Now, let's look at OSS. In the screenshot below from December 22nd, 2010, we're looking at the DOT Field Elements layer and the CCTV, CMS and Chain Requirements sub-layers:

We currently don't have CCTV images from all of California in OSS, but we plan to add more soon. Here are some images from Caltrans. This one is from US 395 near Mammoth. There was very heavy snow here at the time:

DISTRICT 3 - BUTTE, COLUSA, EL DORADO, GLENN, NEVADA, PLACER, SACRAMENTO, SIERRA, SUTTER, YOLO AND YUBA COUNTIES

[Smart Phone Users - Click here for Caltrans Sacramento area traffic cameras](#)

Click on a red camera icon on the map to view an image

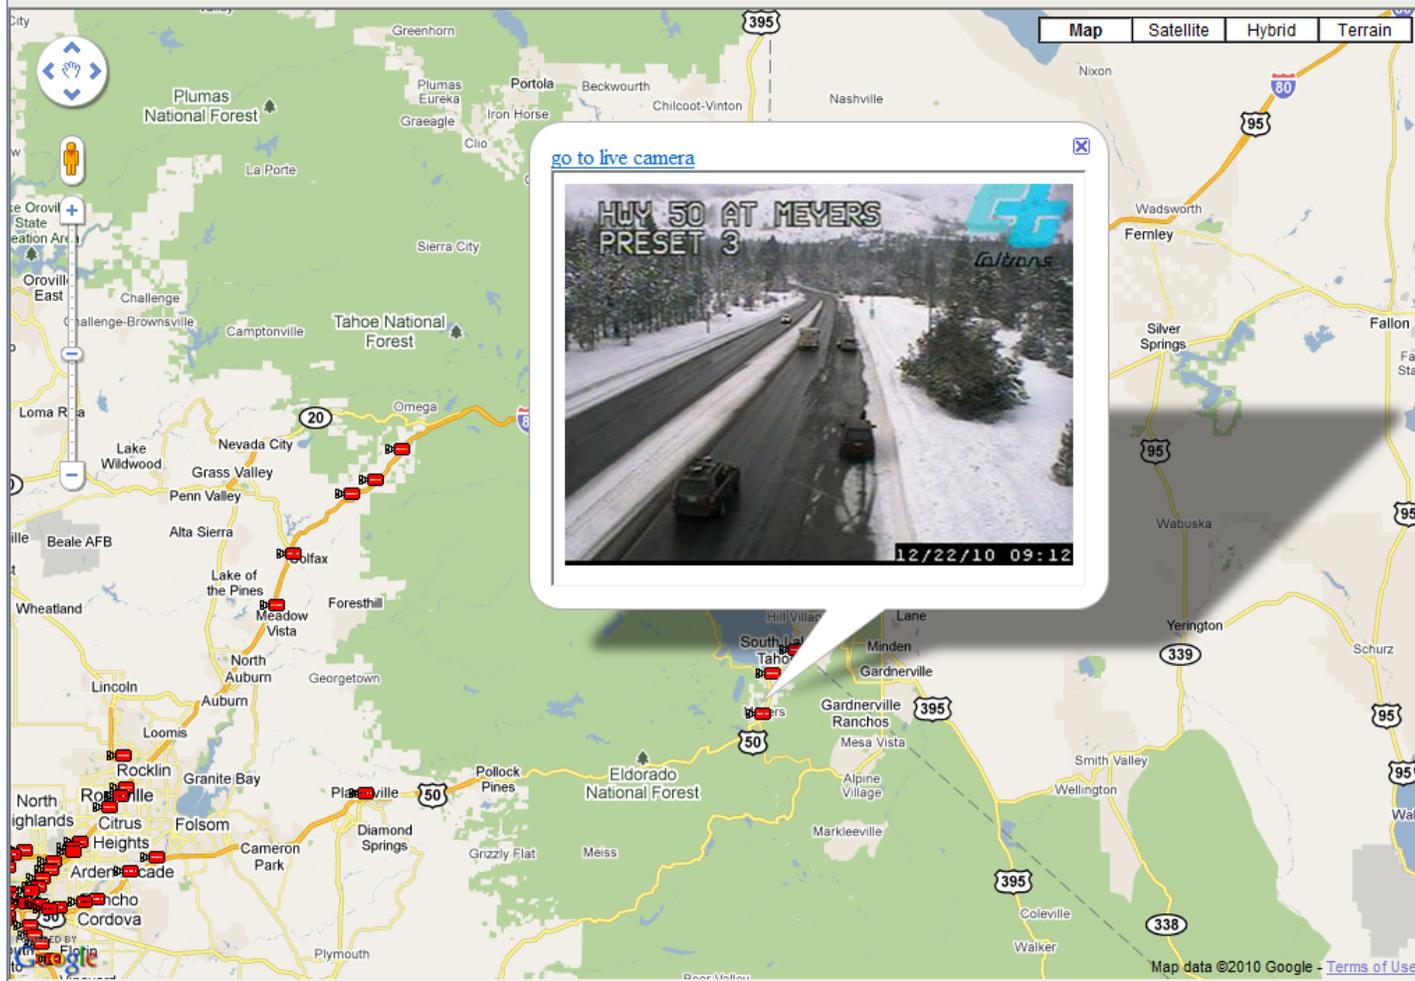

Map data ©2010 Google - [Terms of Use](#)

US 50 south of Lake Tahoe:

DISTRICT 3 - BUTTE, COLUSA, EL DORADO, GLENN, NEVADA, PLACER, SACRAMENTO, SIERRA, SUTTER, YOLO AND YUBA COUNTIES

[Smart Phone Users - Click here for Caltrans Sacramento area traffic cameras](#)

Click on a red camera icon on the map to view an image

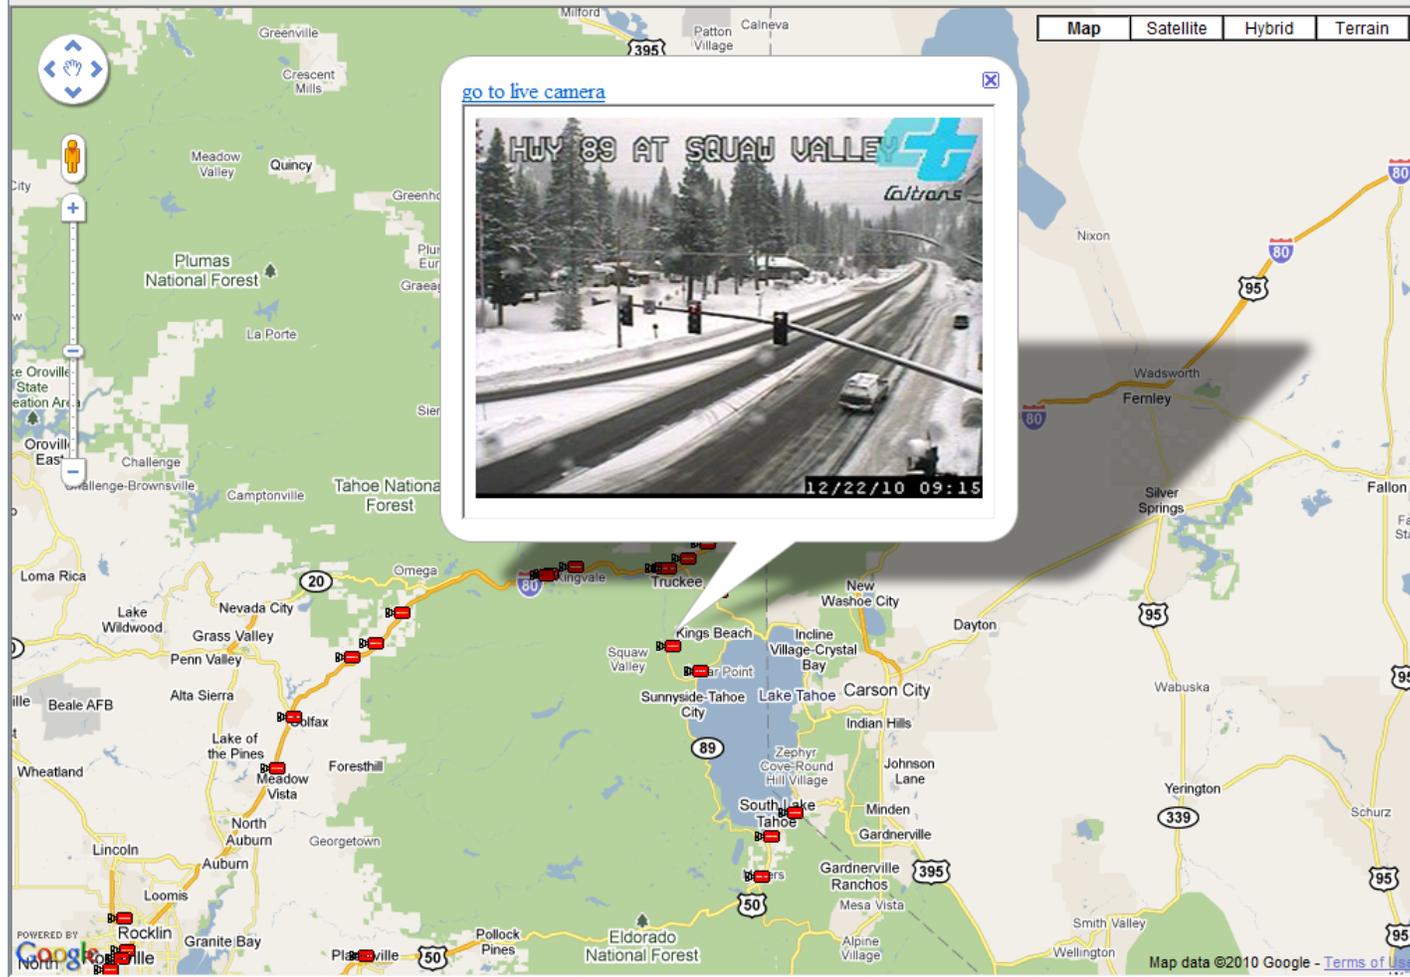

The map displays District 3, covering Butte, Colusa, El Dorado, Glenn, Nevada, Placer, Sacramento, Sierra, Sutter, Yolo, and Yuba counties. Major highways shown include US 50, US 95, US 80, SR 20, SR 395, SR 338, and SR 339. A live camera feed window is overlaid on the map, showing a view of Highway 50 at Meyers. The feed includes the text "HWY 50 AT MEYERS PRESET 3" and a timestamp "12/22/10 09:12". The Caltrans logo is also visible in the feed. The map interface includes a search bar, a compass, a scale bar, and a map style selector (Map, Satellite, Hybrid, Terrain).

SR-89 north of Lake Tahoe:

DISTRICT 3 - BUTTE, COLUSA, EL DORADO, GLENN, NEVADA, PLACER, SACRAMENTO, SIERRA, SUTTER, YOLO AND YUBA COUNTIES

[Smart Phone Users - Click here for Caltrans Sacramento area traffic cameras](#)

Click on a red camera icon on the map to view an image

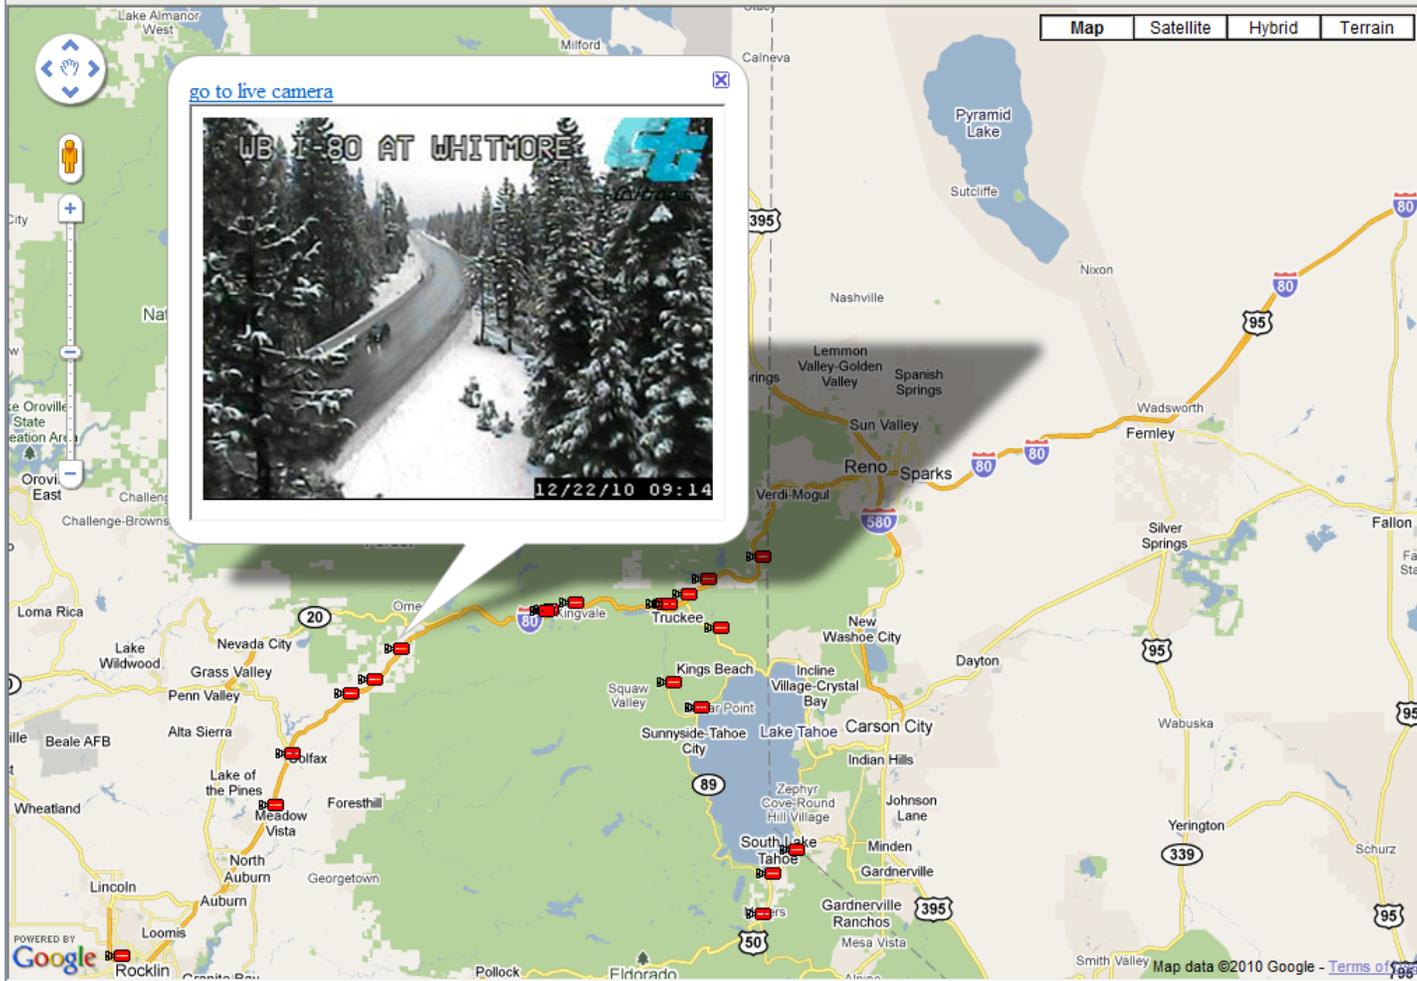

The image shows a Google Maps interface for District 3 counties. A red camera icon on the map is highlighted, and a window titled "go to live camera" is open, displaying a live video feed from a traffic camera. The camera view shows a snowy road with a car and a timestamp of 12/22/10 09:15. The map includes various cities and highways like SR-89, SR-95, and SR-80.

I-80 east of Auburn:

DISTRICT 3 - BUTTE, COLUSA, EL DORADO, GLENN, NEVADA, PLACER, SACRAMENTO, SIERRA, SUTTER, YOLO AND YUBA COUNTIES

[Smart Phone Users - Click here for Caltrans Sacramento area traffic cameras](#)

Click on a red camera icon on the map to view an image

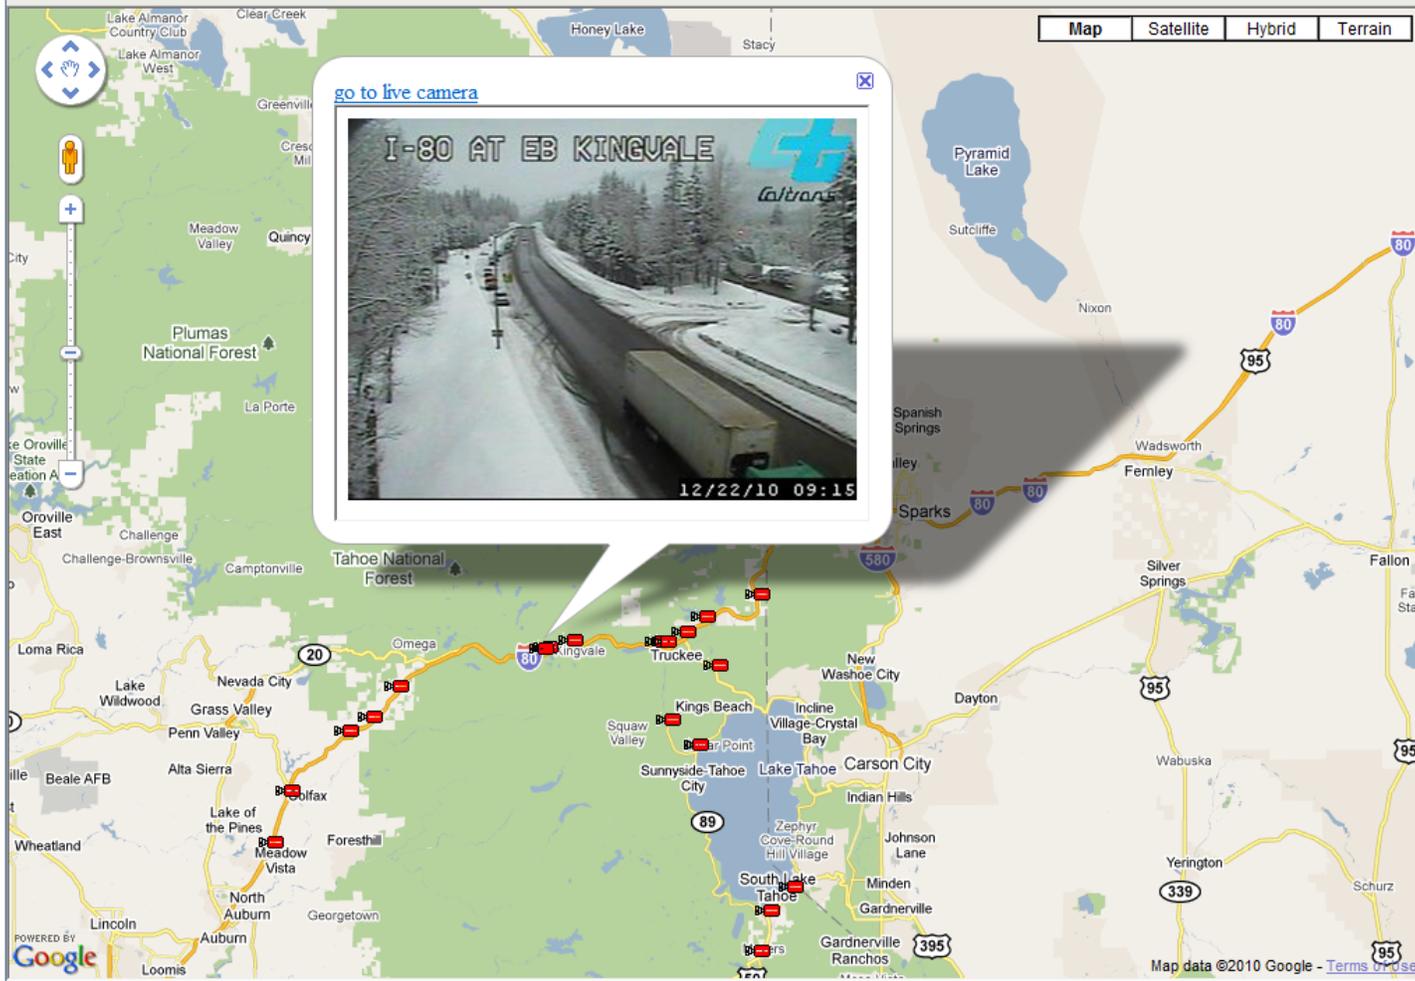

The image displays a Google Maps interface for the Sacramento area. A callout window titled "WB I-80 AT WHITMORE" shows a live video feed of a road covered in snow, with a timestamp of "12/22/10 09:14". The map background shows major highways like I-80, I-95, and SR-99, along with various cities and towns. A legend at the top right of the map area allows switching between Map, Satellite, Hybrid, and Terrain views.

I-80 west of Truckee:

DISTRICT 3 - BUTTE, COLUSA, EL DORADO, GLENN, NEVADA, PLACER, SACRAMENTO, SIERRA, SUTTER, YOLO AND YUBA COUNTIES

[Smart Phone Users - Click here for Caltrans Sacramento area traffic cameras](#)

Click on a red camera icon on the map to view an image

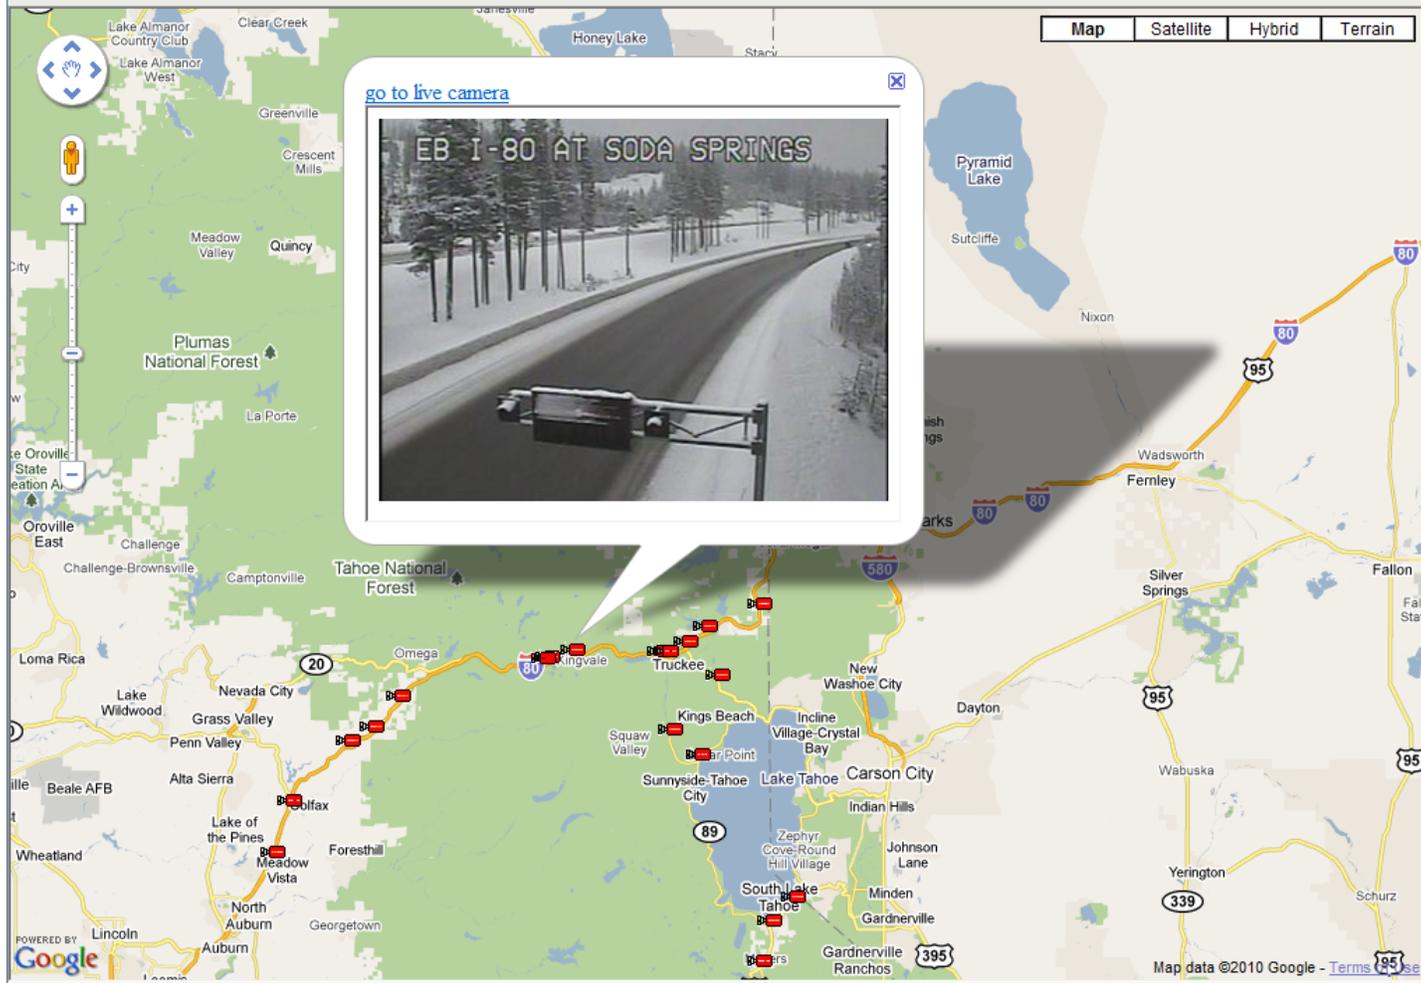

The image shows a map of the Sacramento area with a live camera feed overlay. The camera feed, titled "I-80 AT EB KINGVALE", shows a snowy highway scene with a large truck. The map includes various locations such as Oroville, Truckee, and Carson City. A legend at the top right of the map area shows "Map", "Satellite", "Hybrid", and "Terrain" options. The camera feed also includes a "go to live camera" link and a timestamp of "12/22/10 09:15".

Also along I-80 near Truckee:

DISTRICT 3 - BUTTE, COLUSA, EL DORADO, GLENN, NEVADA, PLACER, SACRAMENTO, SIERRA, SUTTER, YOLO AND YUBA COUNTIES

[Smart Phone Users - Click here for Caltrans Sacramento area traffic cameras](#)

Click on a red camera icon on the map to view an image

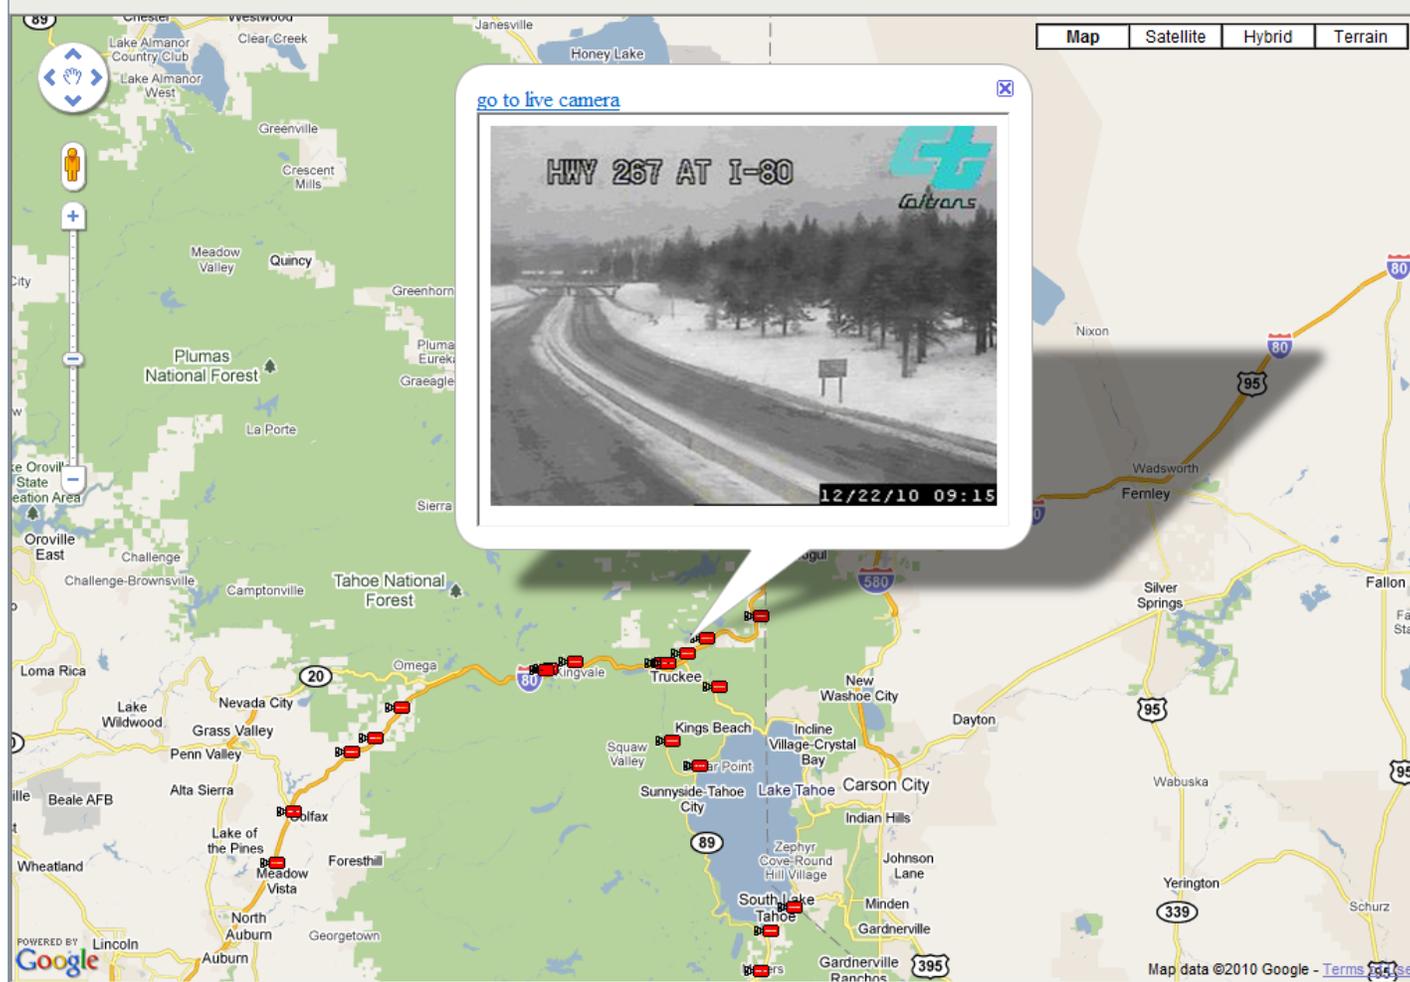

The image displays a Google Maps interface with a callout window showing a live camera feed. The callout window is titled "go to live camera" and shows a view of a highway labeled "EB I-80 AT SODA SPRINGS". The highway is covered in snow, and a camera gantry is visible over the road. The background map shows the Sacramento area with various cities and highways marked. A legend at the top right of the map area includes "Map", "Satellite", "Hybrid", and "Terrain".

SR-287 near Truckee:

DISTRICT 3 - BUTTE, COLUSA, EL DORADO, GLENN, NEVADA, PLACER, SACRAMENTO, SIERRA, SUTTER, YOLO AND YUBA COUNTIES

Here’s another view near Mammoth from later in the day:

DISTRICT 3 - BUTTE, COLUSA, EL DORADO, GLENN, NEVADA, PLACER, SACRAMENTO, SIERRA, SUTTER, YOLO AND YUBA COUNTIES

[Smart Phone Users - Click here for Caltrans Sacramento area traffic cameras](#)

Click on a red camera icon on the map to view an image

The map displays various counties and cities including Sutter, Jackson, West Point, Stanislaus National Forest, and Mammoth Lakes. Highway markers for 395, 108, 49, and 140 are visible. The inset window shows a view of a road winding through a snowy, forested area with mountains in the background.

As you can see, these were eventful days in terms of weather. Keep an eye on the conditions using OSS and WeatherShare.
